

E-gov4youth Project Update: Training Success in Estonia

We are excited to share an update from the E-gov4youth project co-funded by the Erasmus+ Programme (Project#: 2023-2-IT03-KA220-YOU-000177604)!

The transnational Learning Teaching Training Activity (LTTA) was successfully completed in Tallinn, Estonia, from September 9 to 12, 2025.

- A focus on Digital governance

Delegations from all six consortium countries (Italy, Cyprus, Bulgaria, Greece, Norway, and Estonia) gathered in Estonia for this unique experience. The training was hosted by our partner, TalTech – Tallinn University of Technology. Estonia, a European leader in E-Government and Digitalisation, provided an ideal setting for the training.

- Our delegation from Vernian RTI

Vernian RTI was represented by a delegation of seven participants, including:

- Our Project Manager,
- Five young learners (aged 24-29),
- A Public Administration (PA) representative.

This ensured that both youth perspectives and institutional experience were engaged throughout the training.

- Key Activities

The four-day program was packed with activities designed to empower youth in digital civic participation:

- Expert Lectures: Focused on the key concepts that enable successful digital government,
- Co-creation Workshops: Participants generated innovative ideas to boost youth engagement through e-government platforms,
- Team Presentations: Addressed specific country challenges, promoting cross-cultural learning,
- Site Visits: Opportunities to explore Tallinn's advanced digital landscape firsthand.

This training was crucial for sharing knowledge and empowering the next generation to drive digital civic engagement.

We extend our sincere thanks to the team at TalTech – Tallinn University of Technology for their excellent hosting and for making this experience possible!

- Project Information:

- Project Title: Empowering Youth through e-Government: bridging engagement and digital governance
- Programme: Erasmus+
